DETAILED ACTION

1. Claim 1, and 2 are rejected under 35 U.S.C. 102 (b) as being anticipated by Chen (6167613). Chen teaches a carry bag having a flexible outer wall, a flexible inner wall defining a receiving space and being sealed to the outer wall to form an inflatable volume therebetween, a valve 24, and an opening at 10.

Regarding claim 2, note ribs between portions 23.

2. Claims 3-5 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Chen in view of Brockhaus (4679242) or Luque (4974761) or Vandewall (5395022). It would have been obvious for one of ordinary skill in the art to provide a strap 49 having a pair of fasteners (note the clips in Fig. 5 to be mated with the rings in Fig. 7) as taught by Brockhaus to provide an alternative handle.

In the alternative, it would have been obvious for one of ordinary skill in the art to provide a strap with a pair of fasteners as taught by either Luque or Vandewall at each end to provide an alternative carrying means.

Regarding claim 4, the inner wall is sealed to the outer wall at a position space from the opening as shown in Fig. 3.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Valdivielso (407625). Valdivielso teaches a carry bag having a flexible outer wall, a flexible inner wall defining a receiving space and being sealed to the outer wall to form an inflatable volume therebetween, a valve 24, and an opening at 10.

Regarding claim 2, note a circumscribe rib right below E.

Regarding claim 3 note the strap H with fasteners at each end thereof.

Art Unit: 3727

Regarding claim 4, note the bag is rolled down as claimed.

Regarding claim 5, note the fasteners are attached to form a handle as shown in fig. 3.

4. Claims 1-2 are rejected under 35 U.S.C. 102 (b) as being anticipated by either Wang (2003/0155268) or Newman (6283296). Either Wang or Newman teaches a carry bag with outer and inner wall along with the valve, the opening, and the rib as claimed.
